

One of the reasons we sell

BRIDGESTONE

PASSION for EXCELLENCE

In an independent emergency braking test*, Bridgestone tyres stopped 9 metres sooner than a cheaper, imported tyre; and a full 2 metres before impact. That's a life-saving difference.

*Independent testing by Australian tests (A Current Affair, March 2007). Hyundai Elantra test vehicles. Emergency brake at 80km/h on a wet track under controlled conditions. Bridgestone's superior grip and ability to 'pump' water from the road surface made the difference.

Cars, SUV, 4x4, Light Commercial, Motor Homes – WE HAVE IT ALL
